Micro testing information:
The micro testing completed on our Kerrymaid Angelito ice cream product is tested annually. We do not test each production run for TVC's, instead this product is ATP tested to confirm commercial sterility. ATP Bioluminescence procedure carried out on site is not specific to a particular organism. It forms the basis for our positive release system. The packs are commercially sterile. To confirm sterility, production samples are taken according to a specified sampling plan (typically 2 cartons every 5 minutes). These samples are incubated at 30degC for 7 days and then tested using ATP Bioluminescence. Acceptable result of <148 RLU.
